

I am very troubled over what is happening in the name of 'modernization'. Reversing the current standards for cross ownership will surely allow for increased censorship of information. As history has demonstrated repeatedly, this is ultimately the first step in the demise of democracy. Our forefathers are probably turning in their graves over what the FCC is even considering doing! Everyone on the FCC who voted for the reversal needs a lesson in citizenship. Who needs the Taliban when we see actions such as this. I am disgusted as a citizen of the US.
